

Test cases

1 - Homepage design

As a simple user

When I open the app

I can see a map

And it is centered on Gothenburg

And multiple markers show up

And a search bar appears at the top of the page

And at the top "Got To Go" is written in white on a green background

2 - Moving the map

As a simple user

When I am on the homepage

I can see the map centered and zoomed on Gothenburg

And I can unzoom the map

And I can move the map around

And markers will only appear in Gothenburg

3 - Clicking on a marker

As a user

When I click on a marker on the homepage

I can see a new screen appear

And the description of the toilet is present on the page

3.2 - Information page design

As a user

When I am on the description page

I can see a header with an arrow to go back to the first screen and "About this location" written next to it on a green background

And the background of the page is white and green

And there is a square with the description of the toilets written in white.

3.3 - Toilets informations

As a user

When I am on a description of a toilet

I can see the name of the toilet

And underneath, the address

And underneath, the phone number

And underneath if it is wheelchair friendly

And underneath if it is baby friendly

And underneath if it is free

And underneath if it is communal

3.2 - Information missing on the toilets

As a user

When I am on a toilet description
And some information on the toilet is missing
I can see all the information that are given
And no error appears

3.3 - Going back to the map

As a user
When I am on the description page
And I click on the arrow to go back to the homepage
I can see the homepage
And the homepage is exactly the same as before

4 - Search a location

As a user
When I want to search for an area in the search bar
I can see that the map close ups on the localisation I searched for
And the markers around the area are here
And if I move the map I can still see all the markers.

5 - User localisation

As a user
When I look at the map to search for a toilet
I can see my localisation so it is easier to find a toilet
